

## Infrastructure Architect / Pre-Sales Consultant

A great opportunity for an experienced Infrastructure Architect / Pre-Sales Consultant to join a 100% New Zealand owned leading IT company. This is a full-time, permanent position in the O.S.S. Auckland office.

This position requires you to be a strong technician and communicator in one. Strong verbal and written communication skills and confidence in preparing and delivering presentations to both technical and non-technical audiences are essential. You will be required to work closely with our clients in a collaborative and consultative approach to design and standardise infrastructure, providing strategic coordination as well as tactical governance. When dealing with O.S.S. clients, you will need to be a good listener, be easy to do business with, keep commitments, and work alongside fellow O.S.S. architects to do it right first time.

This position will involve utilising industry frameworks to design information systems which are robust and scalable to always ensure the delivery of smooth-running IT systems for our clients' business. O.S.S. prefers hands on architects who don't mind helping out with technical support on occasion.

Pre-Sales tasks include, building relationships with technical contacts, qualifying sales leads from a technical perspective and providing detailed technical quote support.

### Desired Skills and Experience

The Infrastructure Architect / Pre-Sales Consultant position requires a broad range of technical skills which allows you to add value across business, project and technology situations:

- Cloud - AWS, VMware, OpenStack
- Server Virtualisation - VMware/KVM/OpenStack/Hyper-V
- Server Operating Systems – RHEL, Windows, other Linux & UNIX
- Automation tools – Puppet, Ansible, Terraform
- Networking – SDN (ACI), LAN/WAN, firewalls, load balancers, DNS/DHCP
- Backup and recovery strategy
- Management, monitoring and alerting infrastructure
- Authentication services - IAM, Directory Services (AD, LDAP)
- Security concepts – encryption, unified gateways (Fortinet), antivirus, SIEM
- Agile methodology and scrum framework

DevOps - medium to expert knowledge in PaaS (OpenShift), CI/CD tool chain, source control, configuration management and orchestration tools, application deployments.

### About O.S.S.

We've been helping organisations to deliver the most out of information technology since 1995 and in this time have developed a reputation for innovation, quality and a no-nonsense approach to getting things done.

We are 100% New Zealand owned and our client base includes some of New Zealand's best-known and most innovative organisations spanning a variety of sectors. We've worked hard to develop relationships with all of the key technology vendors, however our responsibility is to our clients, and we will always recommend the best solution for the clients' needs.

Our experience is based upon real world knowledge developed from a range of technologies while working with clients around the globe.

### To Apply

Applicants must have the legal right to work in New Zealand and be available to interview in New Zealand. While all applicants will be reviewed, only shortlisted applicants will be contacted.

Email your contact details and a copy of your C.V. to Mark Finlay, Delivery Team Manager – [careers@oss.co.nz](mailto:careers@oss.co.nz)
